Job Card & Production Planning: why it stopped

Candor Foods ERP · root cause analysis · 6 Oct 2026

The problem

In the last month 618 orders came in, but no plans and only 3 job cards were made in the system.

Why it happened

- **Job cards got stuck:** teams couldn't close them unless the weights matched almost perfectly.
- **Planning moved back to Excel:** plans were made in a spreadsheet instead of the system.
- **No one was in charge:** the process kept changing, and nobody noticed people had stopped using it.
